

BragBoard – Week 4 Task Completion Report

Project Title:BragBoard: Internal Employee Recognition Wall

Week:4

E. Saipavan

Github-<https://github.com/saipavanesikela/Bragboard>

1. Objectives for Week 4

- Display all shout-outs on the main feed.
- Implement filters for department, sender, and date.
- Integrate optional image or attachment uploads in shout-outs.

2. Tasks Completed

- ✓ Integrated the feed page to fetch and display shout-outs from the backend database.
- ✓ Added filter functionality allowing users to sort shout-outs by department, sender, and post date.
- ✓ Connected the frontend feed with the backend FastAPI endpoints using secure JWT tokens.
- ✓ Designed a responsive UI for the feed section using Tailwind CSS for better readability.
- ✓ Tested the shout-out display and ensured that newly posted shout-outs appear in real time.
- ✓ Added preliminary setup for image uploads in shout-outs through backend routes.

3. Tools and Technologies Used

- Frontend: React.js, Tailwind CSS
- Backend: FastAPI
- Database: PostgreSQL
- Authentication: JWT (Access + Refresh Tokens)
- Version Control: Git + GitHub

4. Output / Results

- Fully functional shout-out feed displaying all posts dynamically.
- Working filter system for department, sender, and date range.
- Seamless integration between frontend and backend.
- Verified data consistency and UI responsiveness across browsers.

5. Challenges Faced & Solutions

Challenge

Managing state updates when new shout-outs were added

Handling token expiration in API calls

Styling consistency across devices

Solution Implemented

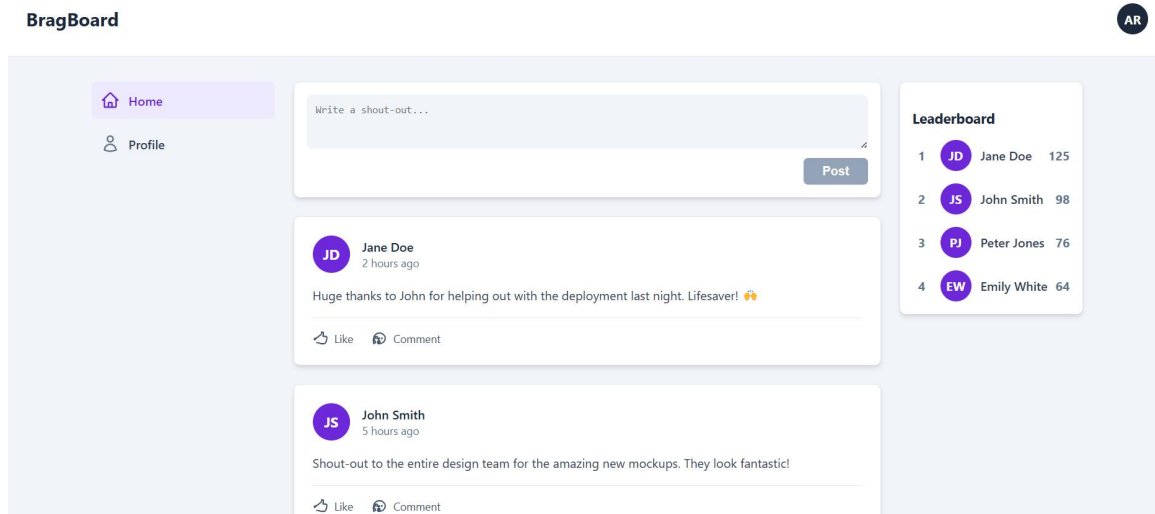

Used React useEffect hook with dependency array to refresh feed dynamically.

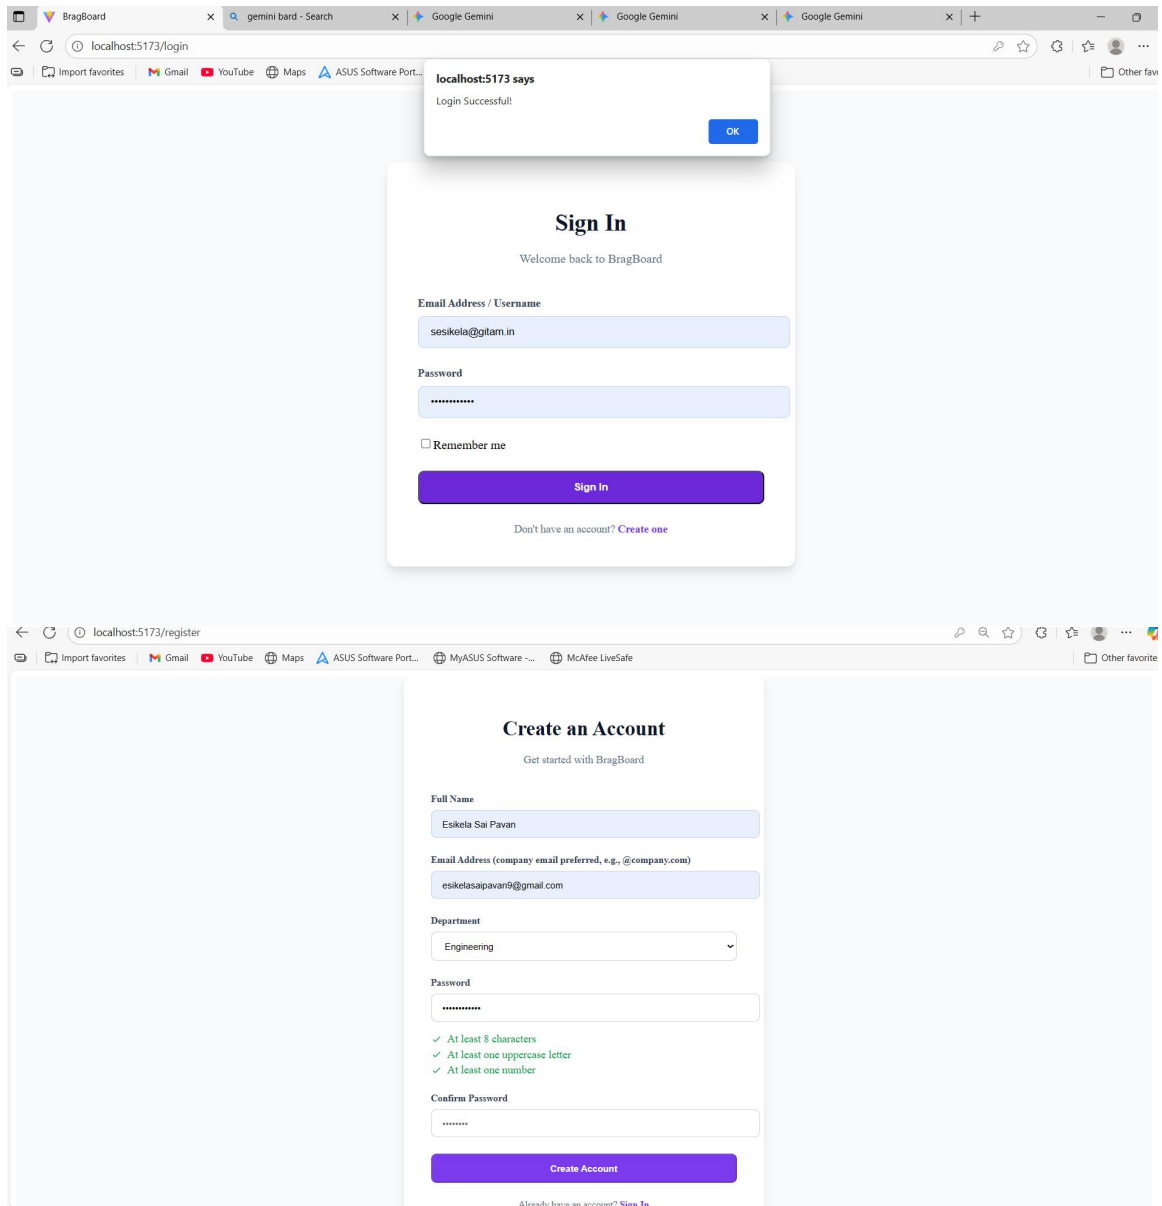

Added token refresh mechanism and proper error handling in Axios interceptors.

Applied Tailwind CSS grid system and responsive breakpoints.

6. Next Week's Goals (Week 5)

• •

Welcome to BragBoard

An internal recognition tool for workplaces that lets employees appreciate their colleagues by posting shout-outs.

Login

Sign Up

Key Features

- Send shout-outs to your teammates to show appreciation.
- Tag multiple colleagues in a single post.
- React to posts with likes, claps, and stars.
- Engage with your team through a built-in commenting system.

Just now

Hello Team Happy Diwali

Begin reaction system (like, clap, star).

- Add reaction counters and link them to user IDs.
- Ensure live updates for reactions without page reload.

7. Summary

Week 4 focused on completing the feed display and filtering features of BragBoard. All objectives were successfully achieved. The system now allows authenticated users to view and filter shout-outs efficiently, marking the completion of Milestone 2.
