

Project Name: Brag Board

Project Title: Exporting Reports (PDF/CSV) & Department-Wise Leaderboards

Submitted by: *Battula Sruthi Keerthi*

Under the Guidance of: *Respected Madhuri Mam*

Task Objectives

1. Add downloadable reports in **PDF/CSV** format.
 2. Generate data such as top contributors and department performance.
 3. Implement leaderboard features to gamify appreciation.
 4. Polish UI and prepare application for deployment.
-

What I Did

This task focused on advanced analytics and output generation.

Report Generation

- Created backend endpoints to export PDF and CSV summaries.
- Included:
 - User shout-out counts
 - Department ranking
 - Reaction statistics
 - Most appreciated employees

Leaderboard System

- Designed leaderboards for:
 - Top contributors
 - Most tagged employees
 - Most active departments
- Added visual cards for ranking.

UI Polish & Testing

- Improved spacing, colors, and consistency using Tailwind CSS.
- Fixed edge-case bugs.

- Enhanced responsiveness across devices.
-

What I Learned

- Working with **file generation** in FastAPI.
 - Converting analytics data into structured visual reports.
 - Gamification concepts and how they increase user engagement.
-

Outcome

Admins can now download PDF/CSV data and view leaderboards.
The UI is more polished and ready for final deployment.

Challenges Faced

- Formatting PDF content neatly.
 - Handling large data files smoothly.
 - Making leaderboard sorting accurate.
-

Reflection

This task improved my knowledge of analytics, data export, and professional reporting systems.

Acknowledgment

I thank **Madhuri Mam** for guiding me in implementing advanced analytics modules.
